

# How to use this pest scouting / growing degree-day (GDD<sub>50</sub>) information sheet:

The information provided here gives **scouting ranges** for insect pests as well as forecasting of **GDD<sub>50</sub> accumulation predictions** for the multiple regions of New Jersey. The pests listed will be listed again in future scouting range announcements as they undergo further development. The forecasting can help you know *what to scout for* and *when to have materials ready* if treatment is required. Site specific GDD<sub>50</sub> models, like those shown here can be obtained at ([USPEST.org/dd/model\\_app](http://USPEST.org/dd/model_app)).
